Acrobat Security Features

Using the Tutorials & Help

Adobe Acrobat is a powerful, application independent, cross-platform publishing tool for electronic or on-line distribution for all types of documents. It includes all the Tools You Need to Convert, Edit & Sign PDFs.

It is ideal for anyone who needs to distribute documents electronically, irrespective of computer platform or program. It is also an ideal tool to enable graphic rich documents to be published on the Internet without the restraints of HTML.

On this course participants will learn how to save their existing files as Portable (PDF) files from various software applications. The course will also cover using Acrobat Pro to create links, bookmarks, thumbnails and forms, as well as create interactive buttons to move between and even launch applications.

For those intending to use this as an Internet tool, we will also cover setting up Web links and creating interactive forms.

Who Should Attend?

Anyone who regularly uses PDFs and want to share and distribute for email, web & print. It is also ideal for anyone who wants to create small portable documents for sharing, tracking and reviewing.

Prerequisites

No experience required.

Takeaways

Participants will learn to open, manipulate or print documents independent of the format employed to create the source documents.

You will learn how to save existing files as Portable (PDF) files from various software applications; understand how to create links, bookmarks, thumbnails, forms, interactive buttons to move between and even launch applications, as well as embed audio and video files.

Courses that can be combined with Photoshop include:

Adobe InDesign
Adobe Creative Cloud

Adobe Photoshop
